glucan 1,4-alpha-glucosidase (EC 3.2.1.3) - yeast (Saccharomyces cerevisiae)
N;Alternate names: extracellular glucoamylase; mucin-like protein MUC1; protein YIR01
C;Species: Saccharomyces cerevisiae
C;Date: 10-Sep-1999 #sequence_revision 10-Sep-1999 #text_change 12-Nov-1999
C;Accession: $48478; A26877; B26877; S27281; JC6123
R;Rowley, K.
submitted to the EMBL Data Library, October 1994

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                          762.5

Sequence 4, Application US/09103429A Patent No. 6187558

GENERAL INFORMATION:

RESULT

```
MOLECULE TYPE: protein
HYPOTHETICAL: NO
ANTI-SENSE: NO
ORIGINAL SOURCE:
ORGANISM: Trichoplusia ni
TISSUE TYPE: peritrophic membrane
US-09-103-429A-4
                                                                                                                                                                                                                                                                            TELEFAX: (607) 256-3628
INFORMATION FOR SEQ ID NO: 4
SEQUENCE CHARACTERISTICS:
LENGTH: 805 amino acids

IT IS THOUGHT THAT PHOSPHORYLATION OF MFH RESULTS IN THE FORMATION OF INTERFLIAMENT CROSS BRIDGES THAT ARE IMPORTANT IN THE MAINTENANCE OF AXONAL CALIBER.
-!- PTM: PHOSPHORYLATION SEEMS TO PLAY A MAJOR ROLE IN THE FUNCTIONING OF THE LARGER REPORPHIAMENT POLYPEPTIDES (NF M AND NF-H), THE LEVELS OF PHOSPHORYLATION BEING ALTERED DEVELOPMENTALLY AND COINCIDENT WITH A CHANGE IN THE NEUROFILAMENT FUNCTION.
-!- SIMILARITY: BELONGS TO THE INTERMEDIATE FILAMENT FUNCTION: REE.1 SEQUENCE DIFFERS FROM THAT SHOWN FROM POSITION 783 ONWARD AND IS LONGER DUE TO A FRAMESHIFT.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           SUBUNIT: RNA POLYMERASE II CONSISTS OF 12 DIFFERENT SUBUNITS.
SUBCELLULAR LOCATION: NUCLEAR.
PTM: THE TANDEM 7 RESIDUES REPEATS CAN BE HIGHLY PHOSPHORYLATED.
THE PHOSPHORYLATION ACTIVATES POLZ.
MISCELLANEOUS: THREE DISTINCT ZINC-CONTAINING RNA POLYMERASES AR
FOUND IN LUKARYOTIC NUCLEI: POLYMERASE I FOR THE RIBOSOMAL RNA
PRECURSOR, POLYMERASE II FOR THE MRNA PRECURSOR, AND TENA GENES.
III FOR 5S AND TENA GENES.
SIMILARITY: BELONGS TO THE RNA POLYMERASE BETA' CHAIN FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       b human gene encoding the largest subunit of RNA polymerase 1 = 159:285-286(1995).

FUNCTION: DNA-DEPENDENT RNA POLYMERASE CATALYZES THE TRANSCHOF DNA INTO RNA USING THE FOUR RIBONUCLEOSIDE TRIPHOSPHATES
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         SUBSTRATES.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          RNA(N).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         :|:| | |: |

J. Mol. Evol. 43:348-356(1996).

-I- FUNCTION: PROVIDES ADHESIVENESS TO THE MUSSEL'S FOOT. MUSSEL'S PRODUCE ONE OF THE STRONGEST WATER INSOLUBLE GLUE. THE MUSSEL'S ADHESIVE IS A BUNDLE OF THREADS, CALLED A BYSSUS, FORMED BY A FIBROUS COLLAGENOUS CORE COATED WITH ADHESIVE PROTEINS.

-I- SUBCELLULAR LOCATION: SECRETED.

-I- TISSUE SPECIFICITY: PRODUCED BY THE BYSSAL GLAND.

-I- DOMAIN: ALMOST EXCLUSIVELY COMPOSED OF REPEATS OF A DECAPEPTIDE.

-I- PTM: PROLINES IN THE REPEAT ARE HYDROXYATED (SINGLE OR DI-) AND ALSO TYROSINE (THUS PRODUCING DOPA = 3,4-DIHYDROXYPHENYLALANINE).

NEUROFILAMENT TRIPLET H PROTEIN (200 KDA NEUROFILAMENT
(NEUROFILAMENT HEAVY POLYPEPTIDE) (NF-H).
SUBMITTED (MAR-1994) to the EMBL/GenBank/DDBJ databases.
Submitted (MAR-1994) to the EMBL/GenBank/DDBJ databases.
Submitted (MAR-1994) to the EMBL/GenBank/DDBJ databases.
AND H WHICH ARE INVOLVED IN THE MAINTENANCE OF NEURONAL CALIBER.
NP-H HAS AN IMPORTANT FUNCTION IN MATURE AXONS THAT IS NOT
SUBSERVED BY THE TWO SMALLER NF PROTEINS.
-I- PTM: THERE ARE A NUMBER OF REPEARS OF THE TRIPEPTIDE K-S-P, NFH IS
-I- PTM: THERE ARE A NUMBER OF THE SERINES IN THE FORMATION OF
THOUGHT THAT PHOSPHORYLATION OF NFH RESULTS IN THE FORMATION OF
INTERFILAMENT CROSS BRIDGES THAT ARE IMPORTANT IN THE MAINTENANCE
OF AXONAL CALIBER.
-I- PTM: PHOSPHORYLATION SEEMS TO PLAY A MAJOR ROLE IN THE FUNCTIONING
OF THE LARGER NEUROFILAMENT POLYPEPTIDES (NF-M AND NF-H), THE
LEVELS OF PHOSPHORYLATION BEING ALTERED DEVELOPMENTALLY AND
COINCIDENT WITH A CHANGE IN THE NEUROFILAMENT FUNCTION:
-I- SIMILARITY: BELONGS TO THE INTERMEDIATE FILAMENT FAMILY.
-I- CAUTION: REF. 2 SEQUENCE DIFFERS FROM THAT SHOWN IN POSITIONS 534

SUBGLILULAR LOCATION: TYPE I MEMBRANE PROTEIN, EXCLUSIVELY ON THE APICAL REGION OF THE SPERM HEAD (BY SIMILARITY).

APICAL REGION OF THE SPERM HEAD (BY SIMILARITY) IN THE STATE SPERM ADDIATE SPERM ADHESION TO THE DOMAIN: THE MAM DOMAINS PROBABLY MEDIATE SPERM ADHESION TO THE ZONA PELLUCIDA.

DOMAIN: DURING SPERM MIGRATION THROUGH THE REPRODUCTIVE TRACTS, THE MUCIN-LIKE DOMAIN MIGHT INHIBIT INAPPROPRIATE TRAPPING OF SPERMATOZOA OR PROMOTING ADHESION TO THE OVIDUCTAL ISTHMUS.

SPERMATOZOA OR PROMOTING ADHESION TO THE COVALENT OLIGOMERIZATION (BY SIMILARITY TO HUMAN INTESTINAL MUCIN MUC2).

SIMILARITY: CONTAINS 3.5 MAM DOMAINS.

SIMILARITY: CONTAINS 4.5 VWFD DOMAINS.

FUNCTION: PROVIDES ADHESTVENESS TO THE MUSSEL'S FOOT. MUSSELS PRODUCE ONE OF THE STRONGEST WATER INSOLUBLE GLUE. THE MUSSEL'S PRODUCE ONE OF THE STRONGEST WATER ADHESTVE IS A BUNDLE OF THREADS, CALLED A BYSSUS, FORMED BY A ADHESIVE IS A BUNDLE OF THREADS, CALLED A BYSSUS, FORMED BY A FIBROUS COLLAGENOUS CORE COATED WITH ADHESTVE PROTEINS.

SUBCELLULAR LOCATION: SECRETED

TISSUE SPECIFICITY: PRODUCED BY THE BYSSAL GLAND.

TISSUE SPECIFICITY: PRODUCED BY THE BYSSAL GLAND.

TOMAIN: ALMOST EXCLUSIVELY COMPOSED OF A DECAPEPTIDE.

DOMAIN: THE DECAPEPTIDE A-K-P-S-Y-P-T-Y-K IS POST-TRANSLATIONALLY

MODIFIED AS FOLLOWING: THE SIXTH AND SEVENTH RESIDUES ARE

MYDROXYLATED AND THE PENULTIMATE IS A 3,4-DIHYDROXYPHENYLALANINE

PTM: HIGHLY GLYCOSYLATED (N-AND O-LINKED CARBOHYDRATES AND SIALIC ACID).

ACID).

POLYMORPHISM: THE NUMBER OF REPEATS IS HIGHLY POLYMORPHIC. IT VARIES FROM 21 TO 125 IN THE NORTHERN EUROPEAN POPULATION. THE MOST FREQUENT ALLELES CONTAINS 41 AND 85 REPEATS.

SIMILARITY: CONTAINS 1 SEA DOMAIN.

Title:
Perfect score:
Sequence: AA3
6814
1 MAWKTLPIYLLLLSVFVIQ.....ARAITTRSGQTLSKVWYNCP 1270

Searched:

Scoring table: BLOSUM62 Gapop 10.0 , Gapext 0.5

Total number of hits satisfying chosen parameters: 100059

100059 seqs, 36664827 residues

Minimum DB seq length: 0
Maximum DB seq length: 200000000

Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

SwissProt_39:*

Database :

pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
